PREPARATION OF THIS DOCUMENT

This document has been prepared within the framework of the Regular Programme activities of the Inland Water Resources and Aquaculture Service of the Fishery Resources and Environment Division. The primary objective of this document is to assist extension workers and other field personnel engaged in fish culture in undrainable ponds to increase production through the application of improved culture technology.

The original manuscript was prepared by Mr. Dilip Kumar of the Central Institute of Fisheries Education, Bombay, India, based on the Indian experience of fish culture in undrainable ponds, and it was edited by Mr. P.C. Choudhury. It is hoped that this manual will be useful to extension workers and fish farmers in areas where fish ponds are not drainable.

Kumar, D.

Fish culture in undrainable ponds. A manual for extension.

FAO Fisheries Technical Paper No. 325. Rome, FAO, 1992. 239 p.

ABSTRACT

This manual deals with the methods of freshwater fish culture in undrainable ponds as practised in India. The manual is primarily meant for extension workers and aquaculture training institutions. It outlines the basic principles of fish culture and the characteristics of undrainable ponds. The systems of composite carp culture and composite carp culture-livestock farming have been described. Methods of improvement of existing ponds and construction of new ponds have been included. The suitable species for culture, procurement of their seed, stocking ratios of various species under composite culture, etc., have been discussed. Pond management, both pre-stocking and post-stocking, including fish health management and management of common hazards have been dealt with. It also contains information on marketing and economics of fish culture in undrainable ponds.

ACKNOWLEDGEMENTS

Sincere gratitude is expressed to the Fisheries Department of the Food and Agriculture Organization of the United Nations for suggesting and sponsoring the preparation of this manual and to the Indian Council of Agricultural Research (ICAR), Ministry of Agriculture, Government of India, for kindly permitting me to take up this job. The author is indebted to Drs. R.M. Acharya, P.V. Dehadrai, and M.Y. Kamal, ICAR Headquarters, New Delhi, who were instrumental in obtaining this permission. Sincere support, encouragement, valuable guidance and never-ending help is extended to Drs. V.R.P.Sinha, S.D. Tripathi, and A.G. Jhingran. The author extends his heartfelt thanks to Dr.N.G.S. Rao, Mr. M. Ranadhir, Mr. H.A. Khan, Mr. B.B. Satpathy and Dr. B.N. Singh for critically going through the relevant chapters of the manuscript. Finally, he is glad to acknowledge the tremendous help provided by his colleagues Mr. Kuldeep Kumar, Dr.S.K.Sarkar, Mr. C.D. Sahoo, Dr. S.N. Mohanty, Dr. N. Sarangi, Mr. M.S.Tantia, Mr. R.K.Dey, Mr. A.K. Sahoo, Mr.S. Ayyappan, Mr. C.S. Purushothaman, Dr. K. Jankiram, Mr. D. Narayanswamy, Mr. B.K. Mishra, Mr. Radheyshyam, Sri P. Jena, Sri R.C. Behera and at the end he also wishes to express his sincere thanks to his parents, wife and family members who gave their total support.

TABLE OF CONTENTS

1. INTRODUCTION
1.1 Fish as food
1.2 High multiplication capacity and minimal water requirement
1.3 Low energy requirement for protein production
1.4 Warm water favours fish growth
1.5 Aquaculture production potential
1.6 Employment potential
2. PRINCIPLES OF FRESHWATER FISH CULTURE
2.1 Pond ecosystem
2.2 Oxygen budget

2.3 Desirable fish species for culture
2.4 Living space
2.5 Supplementary feeding
2.6 Pond fertility
2.7 Diseases and their control
3. CHARACTERISTICS OF UNDRAINABLE AND DRAINABLE PONDS
3.1 Undrainable ponds
3.1.1 General morphometry
3.1.2 Physico-chemical environment
3.1.3 Community structure and function
3.2 Drainable ponds
4. PRESENT PRACTICES OF FISH CULTURE IN PONDS
4.1 Carp culture
4.2 Integrated carp farming
4.2.1 Integrated fish-pig farming
4.2.2 Integrated fish-duck farming
4.2.3 Integrated fish-poultry farming
4.3 Air-breathing fish culture
4.4 Sewage-fed fish culture
5. RENOVATION OF EXISTING PONDS
5.1 When to take up the renovation work
5.2 Deweeding
5.3 Dewatering and drying
5.4 Contouring
5.5 Desilting
5.6 Reclamation of derelict water bodies
5.7 Maintenance of dykes
6. CONSTRUCTION OF NEW PONDS AND FARMS
6.1 Site selection
6.1.1 Topography
6.1.2 Source of water and its quality
6.1.3 Soil type
6.2 Designing
6.2.1 Water area ratio among pond types
6.2.2 Dyke
6.3 Construction
6.3.1 Time of construction
6.3.2 Preparation of site
6.3.3 Marking the outlines
6.3.4 Pre-excavation work
6.3.5 Pond excavation and construction of dykes
6.3.6 Water inlet structure
6.4 Maintenance
7. FISH SPECIES SUITABLE FOR CULTURE IN PONDS
7.1 Criteria for selection of suitable fish species
7.2 Fish species suitable for culture in undrainable ponds
7.2.1 Catla

7.2.2 Rohu
7.2.3 Mrigal
7.2.4 Silver carp
7.2.5 Grass carp
7.2.6 Common carp
8. PROCUREMENT OF INPUTS
8.1 Procurement of seed
8.1.1 Collection of spawn from riverine sources
8.1.2 Bundh breeding
8.1.3 Induced spawning by hypophysation
8.1.4 Production of common carp seed
8.2 Feed
8.2.1 Natural food
8.2.2 Supplementary feed
8.3 Fertilizers
8.3.1 Organic manures
8.3.2 Inorganic fertilizers
9. POND MANAGEMENT
9.1 Pre-stocking management
9.1.1 Eradication and control of aquatic weeds and algae
9.1.2 Eradication of unwanted fish
9.1.3 Eradication of predatory insects
9.1.4 Fertilization of ponds
9.2 Stocking
9.2.1 Stocking of nursery ponds
9.2.2 Stocking of rearing ponds
9.2.3 Stocking of growout/stocking ponds
9.2.4 Method of stocking
9.3 Post-stocking management
9.3.1 Feeding
9.3.2 Periodic fertilization
9.3.3 Pond environmental monitoring
9.3.4 Fish health monitoring
10. MANAGEMENT OF COMMON HAZARDS
10.1 Deficiency of dissolved oxygen
10.2 Appearance of algal blooms
10.3 Common carp problem
10.4 Problem of no rain and plenty of rain
10.5 Problem of predation
10.6 Poaching
10.7 Leakages in embankment
10.8 Outbreak of diseases
10.8.1 General considerations
10.8.2 Common diseases
10.8.3 Therapy of fish diseases
11. HARVESTING
11.1 Harvesting in nursery ponds

11.2 Harvesting in rearing ponds
11.3 Harvesting in growout ponds
11.3.1 Complete harvesting
11.3.2 Partial harvesting
11.4 Application of proper gear
11.5 Precautions
12. TRANSPORT AND MARKETING
12.1 Transport of fresh fish
12.2 Transport of live fish
12.2.1 Conditioning and preparation for transport
12.2.2 Open system of transport
12.2.3 Closed system of transport
12.2.4 Drugs and chemical aids
12.3 Marketing
12.3.1 Market potential
12.3.2 Marketing of table-size fish
12.3.3 Marketing of fish seed
13. ECONOMICS OF CULTURE OPERATIONS
13.1 Raising of fry
13.2 Raising of fingerlings
13.3 Raising of table-size fish
14. AQUACULTURE EXTENSION
14.1 Objective
14.2 Launching aquaculture extension programme
14.2.1 Programme planning
14.2.2 Programme implementation
14.2.3 Programme evaluation
14.3 Important considerations
