The Manual of Procedures for the Implementation of the Asia Regional Technical Guidelines on Health Management for the Responsible Movement of Live Aquatic Animals provides background material and detailed technical procedures to assist countries and territories in the Asia Region in implementing the Asia Regional Technical Guidelines on Health Management for the Responsible Movement of Live Aquatic Animals. The Technical Guidelines and their associated implementation plan, the Beijing Consensus and Implementation Strategy (BCIS), (see FAO Fish. Tech. Pap. No. 402) provide expert guidance for national and regional efforts in reducing the risks of disease due to trans-boundary movement of live aquatic animals. The preparation of Technical Guidelines and the Manual of Procedures were jointly initiated by FAO and NACA in 1998 through an FAO Technical Cooperation Programme (TCP) Project - “Assistance for the Responsible Movement of Live Aquatic Animals”, with the participation of 21 countries from throughout the region. This programme complemented FAO's efforts in assisting member countries to implement the relevant provisions in Article 9 - Aquaculture Development - of the Code of Conduct for Responsible Fisheries (CCRF), at both the national and regional levels.
